

Neonode Workbench 2.23.0

Contents of Release

- Added new setting called size restriction.
- Added tooltip to all settings in device configuration.

New features

- The setting size restriction is now available and offers a way to filter out touches based on the size of the touching object. The size value may differ depending on the material of the object and where it is located in the touch active area.
- A small tooltip has been added to all settings in the device configuration, in order to better explain what the different settings can be used for. Hover over the small "?" icon in order for a tooltip to appear.
